TravelTales

– Application for location based storytelling

[TravelTales Release 3.2]

TravelTales 3.2

- **New stuff in this release:**

    - Online TravelTales configuration tool
        - The tool can be used to create a journey for TravelTales
        - The tool will output a zip-file ready to be placed on the TravelTales server

    - TravelTales for Android based devices
        - Added Google Maps in the 'Show Position' page

    - Common for iOS and Android
        - Comma (,) can be used as separator in the coordinates – thus coordinates from maps.google can be used directly in the TravelTales configuration file.

TravelTales 3.2

- Legacy contents in this release:

    - Common for Android and iOS based devices
        - GPS based activation of sound files (.mp3)
        - Configurable accuracy
            - 5 meters – 200 meters
        - Easy management by xml based configuration files
        - Several journeys (packages) can be carried along simultaneously
        - Local database storage
        - Automatic language selection
            - English and Danish currently supported
        - Volume control
        - Remote journey download introducing the TravelTales servers

TravelTales 3.2

- Local journey selector
- Sound test capability
- Easy handling of licensing
- Features to support Orienteering; Travel-O
- Map view for current location
- Map view for points of interest

- iOS specifics:
  - Supports iOS 6.0 and newer
  - Available in the App Store

- Android specifics:
  - Supports Android 2.2 and newer
  - Available at Google Play

TravelTales 3.2

- J2ME / Symbian specifics:
    - Supports MIDP2.0 and newer
    - Supports Symbian OS 9.2 and newer
    - Code signed by Thawte valid until 15th of July 2013
    - R2.2 is available for download at www.TravelTales.dk

    - J2ME / Symbian handsets are not official supported anymore.
    - Some handsets will still work – test the handset before using it in an event.

Interoperability

- Refer to the interoperability report
    - http://www.traveltales.dk/interoperability.pdf

What's next…

- **Roadmap enhancements**
  - Accuracy per point (for Android)
  - TravelTales Server user interface
